

Exciting new treatments available at AFPLS

Dermal Fillers

CosmoDerm and CosmoPlast:

A new Collagen Replacement Therapy is now available. Made from human collagen, CosmoDerm and CosmoPlast do not require a pre-treatment skin test. CosmoDerm and CosmoPlast replenish your skins' lost collagen, restoring skin structure and provide immediate results with no down time. The effect of CosmoDerm and CosmoPlast should last approximately 3-6 months.

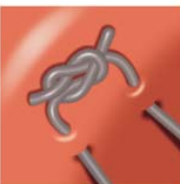

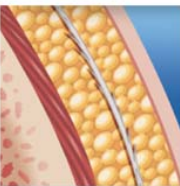

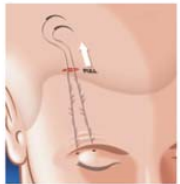

Bioinblue

Bioinblue: A temporary new wrinkle filler is now available in Australia. It is longer lasting, which means fewer visits. The effect of Bioinblue should last approximately 12-18 months.

Bioinblue is excellent for correcting deficiencies in the soft tissues by injection. It may be used to correct the shape of lips, fine and deeper wrinkles, post-traumatic or acne scars and other types of soft tissue deficits.

Introductory Offer:

Receive a complimentary skin care consult with one of our Dermal Therapists and a complimentary Glycolic Acid Peel (mild peel with no down time) with your first Bioinblue or Collagen replacement treatment if booked before the 30th of April 2006.

ContourThreads

One of the procedures successfully performed at Academy Facial Plastics – ContourThreads

Everybody wants the least invasive techniques to achieve the maximal results. In recent years thread lifts have become increasingly popular and we feel that they are now a good alternative in many situations.

Contour Threads, used at Academy Facial Plastics for approximately seven months, seem to have overcome many of the limitations of threads that were available previously. Dr Oates was selected to be the West Australian trainer for Contour Threads and was trained by the inventor of Contour Threads in Sydney last year.

What are ContourThreads and how do they work?

Contour Threads have tiny barbs or cogs, that are spaced evenly apart. Once inserted under the skin, they are fixated in an umbrella-like fashion and with tension create suspension that gently lifts sagging tissues of the brow, face and neck. Due to the unique design of the cogs of Contour Threads, the surrounding tissues act to hold the threads in place without the need for visible scars. Once in position, your body generates new collagen bundles that surround each thread to maintain the lifting effect.

ContourThreads are used for:

- 1 Repositioning sagging cheeks, jowls and neck
- 2 Lifting sagging eyebrows
- 3 Adjusting asymmetric brows or face

How long do the results last?

Duration varies depending on the age of the patient at the time of the procedure, the degree of sagging and the number of threads used. Additional threads may be inserted as needed.

Skin Needling (Skin Rollers)

Skin needling is an exciting new treatment, which has been shown to reduce acne and traumatic scarring, smooth wrinkles, improve skin texture and reduce the appearance of stretch marks.

How is it done?

The skin roller causes multiple tiny pinpoint puncture wounds to the dermis. These dermal injuries lead to new collagen formation via the normal skin repair mechanisms.

How many treatments are required?

4-5 treatments are required on a six weekly basis. Improvement in scarring and texture can be seen in 2-3 months.

How much are the rollers and the cost of the treatment?

The first treatment is \$ 300.00, which includes the skin roller and a tube of Emla anaesthetic cream.

Subsequent treatments are \$ 180.00

Skin Care

Vitamin C – Nature's wonder nutrient

Vitamin C is a multifunctional vitamin, helping to maintain good health and wellbeing both inside and out. It comes in the form of supplements, which may help decrease the symptoms of colds and other mild infections and support a healthy immune system. Vitamin C is also available in the form of creams, which help

- 1 Photo ageing and stimulation of collagen
- 2 Moisturise and reduce the appearance of skin tone, pigmentation, coarse texture and fine lines
- 3 Restore a smoother, softer and more youthful radiance
